Manalapan dentist Dr. Steven Burman and his friendly staff love helping brides, grooms, and their families achieve healthy, picture-perfect smiles for the wedding day, and forever. Many details require your attention; don't forget your smile! A professional cleaning can help remove dulling your smile dazzle. Cosmetic dentistry can improve teeth that are stained, chipped, cracked, broken, widely spaced, poorly shaped, or eroded at the gumline. Enamel shaping smoothes jagged edges; laser gum contouring reduces a gummy smile and makes teeth appear more symmetrical; and implants can permanently fill spaces. You and your groom should visit the dentist a month before your honeymoon to identify and correct problems to lessen the likelihood of having dental issues while you're away. Dr. Burman and his caring team are available to answer your questions and provide you with outstanding service, treatment, comfort, and natural results using advanced technology. Exclusive appointments (no overbooking) assure you'll be taken on time, giving you more time to enjoy planning your special day! Call the office at (732) 972-9950 or visit www.stevenburman.com to learn more about this unique dental practice which a patient described as "a diamond in the rough."

Fitness Together

in Freehold offers wedding fitness at its best. Every bride and groom wants to look great on their wedding day. Here are three ways that you as a bride or groom can improve your physical fitness to be ready for your wedding day and honeymoon: 1. Perform weight training three times a week. Weight training is the only type of exercise that will help you add muscle and will get you that lean, toned look you have been striving for. Resistance training builds muscle, which allows you to burn calories all day long. 2. Perform aerobic exercise three to five times a week. Aerobic

exercise, otherwise known as cardio, will assist you in burning fat. Start with a minimum of 15 minutes of cardio and eventually build up to a steady 30-45 minutes of continuous movement, either in the form of walking, jogging or bicycling. 3. Eat proportionate meals every three hours. In order to speed up metabolism so that you burn calories all day long and are in great shape for your wedding, it is important to fuel your body by eating every three hours. For more information on fitness and personal training, visit www.ftfreehold.com or call (732) 431-5555.
